Maritime Pack 01.12

[Sep 1, 2018](#)

Updated for KSP 1.4.x

Support me on
PATREON

Build your own side or sternwheeler.

NOTE: If you are upgrading from previous versions of Maritime Pack, delete the entire Maritime Pack directory under GameData prior to installing!

The Maritime Pack - Yachts, Cargo Ships, Paddlewheelers, RoRo's, Carriers and lots more parts to create you own armada. With over (currently) 40 parts, the Maritime Pack is a modular parts pack that allows you to design boats for KSP the way you want them.

Easily transport hundreds of tons of cargo, dozens of Kerbals or rovers to distant shores. Go yachting on Eve's Explodium Sea, support multiple bases on Laythe by water or experience history and take a Paddlewheel cruise up Kerbin's rivers. Looking for the ultimate pilot challenge? Try landing on the CVE.

Maritime Pack Cargo Ship

The ocean is your frontier and to conquer it you only need imagination... and the Maritime Pack.

Now includes: The Submarine Pack!

Maritime Pack Submarine

[Release thread on the KSP Forums.](#) Please forward all questions to that thread. I do NOT check these comments.
